Pharmaceutical Chemistry Department

Postgraduate Courses and Programs

Comprehensive Organic Chemistry; Code: PHC 703

Programme(s) on which the course is given:	Master Degree in Pharmaceutical Sciences (Pharmaceutical Chemistry)
Department responsible for offering the course:	Department of Pharmaceutical Chemistry
Department responsible for teaching the course:	Department of Pharmaceutical Chemistry
Academic year:	Master Preliminary year /2nd Term
Course title and code:	Comprehensive Organic Chemistry; Code: PHC 703
Contact hours (credit hours):	Lecture: 3 (3), Total: 3

Overall Aims of Course

After attending this course the students would be expected to

- Correctly identify the most suitable methods of protection of different functional groups under different conditions.
- Identify the mechanisms by which different chemical reactions takes place.
